

// KING CUT

A portable dry cutting sawing machine, producing the fastest and cleanest burr-free cuts in a wide variety of metals, including stainless steel. Dry cut with no heat and no sparks for maximum site safety and without distortion or discolouration of the workpiece.

Key features

WITH A HIGHER TOOTH DENSITY THAN MANY OTHER TYPES OF BLADES, KINGCUT DRY CUTTING BLADES PROVIDE GREATER CUTTING CAPACITY, FASTER CUTTING TIME AND LONGER LIFE. AVAILABLE IN A RANGE OF TOOTH PITCHES TO SUIT MILD, STAINLESS STEELS AND ALUMINIUM, THESE DRY CUTTINGS BLADES ALSO GENERATE MINIMUM FRICTION SO THERE IS ALMOST NO DISCOLOURATION OF THE MATERIAL BEING CUT.
